Transforming wool, meat and the sheep that produce them

About the Sheep CRC Updates

The Sheep CRC is now halfway through its 7-year term and has a great deal of useful information that sheep producers can apply now.

The Updates provide an overview of these current results as well as steps for more details and training.

Leading researchers will be on hand to describe the results and the implications for different production systems. See the program below for the topics to be covered.

Advances in genetics flow through the entire program, with a feature on interactions across meat and wool, reproduction and disease resistance provided.

I hope that you are able to attend.

James Rowe
CEO, Sheep CRC

Program

8.30	Registration – please arrive well before 9 am	
9.00	Welcome	
9.15	Outlook for sheep and wool	James Rowe, Sheep CRC
9.45	Genetics – delivering permanent improvement	Hamish Chandler, MLA
10.00	Lifetime production from ewes and lambs	Chris Shands, I & I NSW
10.30	Morning tea	
11.00	Beating the blowfly	Deb Maxwell, Sheep CRC
11.30	Benefitting from precision sheep management	Guy Newell, DEEDI
12.00	Targeting Worms with treatments and testing	Deb Maxwell, Sheep CRC
12.30	Lunch	
1.15	Nutritious high yielding lambs	Alex Ball, MLA
2.00	Wool you want to wear	James Rowe, Sheep CRC
2.30	Genetic interactions	Hamish Chandler and Alex Ball, MLA
3.15	Forum	
3.30	Close	

Advance notice: Sheep CRC Conference, Adelaide, 20-21 October 2010

This will be the sheep industry's premier event for the year with a packed 2-day program covering all of the Sheep CRC's results to date.

The event targets producers, consultants, advisers, meat and wool specialists, industry service providers and contractors, scientists and extension staff and includes presentations from Australia's leading commercial and stud producers.

Presentations will provide the depth and understanding required by industry leaders, those who provide industry advice to others and producers aiming to stay at the cutting edge.

Genetics and the rapid advances in genomics will be a key thread across the topics of meat, wool and the sheep that produce them.
