Katanning and Northam Sheep CRC Updates

The Sheep CRC is inviting farmers, consultants and others with a stake in the sheep industry to attend free Sheep CRC Updates at Northam on Thursday 11 February and at Katanning on Wednesday 10 February.

There will be sessions on the latest practical outcomes and early findings from new areas of research from the Sheep CRC's programs, including:

- optimising reproduction and lifetime production from your ewes
- winning the battles against worms and blowflies
- improving returns from sheepmeat through better taste and nutritional qualities
- wool production for comfort and colour
- practical use of new and improved genetic tools into your selection program

Key presenters include Dr David Pethick, Murdoch University, on meat quality and yield and Dr Alex Ball, MLA, on genetic interactions.

Lunch and snacks are provided, so please RSVP to Janelle Holzberger on 02 6773 2927.
